## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1 and 7 are patentable over the prior art patents and printed publications because of the specific electrophotographic method and apparatus for forming a color image, wherein it is determined whether or not a thin-line emphasis for image forming is designated, and the image forming is performed by either a first image forming step or a second image forming step based on the determination result, wherein the first image forming step consists of performing halftoning while reducing a pixel value indicative of a printing color component at a predetermined rate and the second image forming step consists of performing halftoning without reducing a pixel value indicative of a printing color component, while reducing an amount of exposure light at a predetermined rate. The combined limitations as currently are not taught by the prior art of record alone or in combination.

Claims 2-6 and 8-12 are allowed because they are directly or indirectly dependent from claims 1 and 7 above.

Ishizuka et al. (Pub. No. U.S. 2003/0179396) discloses an image processing device including a selecting device for selecting either a gradation emphasizing mode or a thin line emphasizing mode, wherein when the thin line emphasizing mode is selected the input image data is processed with a higher screen frequency so as to produce a fine dot image.

Tanaka et al. (U.S. 5,999,202) discloses an image forming apparatus for forming image constructed by thin lines by concentrating the exposure intensity of the laser light on each pixel.

Yamada et al. (U.S. 5,565,995) discloses an image recording apparatus for printing a halftone image wherein the exposure intensity of the laser light source is increased or decreased based on the computed density ratio between the density signal corresponding to the solid image and the density signal corresponding to a predetermined halftone image.

Each of the cited prior art fails to teach the dual mode processing based on the determination of whether or not a thin-line emphasis for image forming is designated as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
